PRE ENGINEERED BUILDING •

ALL TYPES OF FABRICATION, ERECTION & P.E.B. STRUCTURE & ENGINEERING

ABOUT US

Shivam Enterprises is a trusted name in structural steel fabrication, PEB structures, and industrial engineering. We deliver high-quality, durable, and cost-effective solutions for warehouses, factories, and industrial projects.

Structural Steel Fabrication

We provide precision fabrication services using high-quality materials for strong and reliable industrial structures.

PEB & Industrial Structures

We design and build PEB sheds, warehouses, and factory buildings with modern techniques & efficient execution.

VISION

To become a leading and most trusted provider of structural steel fabrication and PEB solutions, known for innovation, quality, and excellence in delivering durable industrial infrastructure.

MISSION

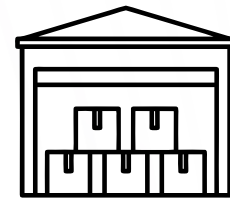

To deliver high-quality, cost-effective, and reliable engineering solutions by using advanced technology, skilled expertise, and a customer-centric approach, while ensuring timely project completion and long-term value for our clients.

OUR FABRICATION & ENGINEERING SERVICES

STRUCTURAL STEEL FABRICATION

High-quality steel fabrication services for industrial & commercial structures with durability and precision.

WAREHOUSE BUILDINGS

Efficient warehouse construction solutions designed for storage, logistics, and industrial operations.

TURNKEY ENGINEERING PROJECTS

Complete turnkey engineering solutions from design to execution with quality and cost efficiency.

PEB STRUCTURES

Design and construction of pre-engineered buildings for warehouses, factories, and industrial applications.

INDUSTRIAL SHED FABRICATION

Customized industrial sheds built using strong materials ensuring durability and long-term performance.

STEEL STRUCTURE ERECTION

Professional steel structure erection services with safety, accuracy, and timely project completion.

WE PROVIDE QUALITY FABRICATION PRODUCTS

HEAVY FABRICATION

Our heavy fabrication services are designed to meet the demanding requirements of large-scale industrial and infrastructure projects. We specialize in manufacturing robust steel structures, equipment frames, and customized components with high precision and consistency. Using advanced fabrication techniques and skilled workmanship, we ensure every product meets strict quality and safety standards.

FEATURES

- High-strength steel fabrication for heavy-duty applications
- Custom-built structures as per project requirements
- Strict quality control and dimensional accuracy

BENEFITS

- Enhanced durability & load-bearing capacity
- Reduced maintenance and longer service life
- Timely project execution with consistent quality
- Cost-effective solutions tailored to client needs

WELDING SOLUTIONS

Welding solutions use advanced techniques and modern equipment to create strong, precise, and durable metal joints for industrial and construction applications. With processes like MIG, TIG, and automated welding, they ensure high accuracy, consistent quality, and faster production. These solutions support multiple materials, improve efficiency, reduce waste, and deliver reliable, cost-effective performance.

FEATURES

- Strong and precise metal joining
- Works on various metals and thicknesses
- Advanced methods (MIG, TIG, arc, laser)
- Suitable for manual and automated operations

BENEFITS

- Durable and permanent joints
- Cost-effective and time-saving
- Leak-proof and clean finish
- Improves productivity and efficiency

INDUSTRIAL FABRICATION

Industrial fabrication is the process of cutting, shaping, and assembling raw materials—mainly metals—into finished structures or components used in construction, manufacturing, and engineering. It includes processes like welding, machining, bending, and assembling.

FEATURES

- High precision and strength
- Custom design and manufacturing
- Use of advanced machinery and techniques

BENEFITS

- Durable and long-lasting products
- Cost-effective for large-scale projects
- Improves efficiency and structural reliability

PEB STRUCTURES

Pre-Engineered Building (PEB) structures are factory designed steel buildings assembled quickly on-site. They offer high strength, cost-effectiveness, and flexibility in design for industrial applications. PEB structures ensure faster construction, durability, and low maintenance compared to traditional buildings.

FEATURES

- Pre-designed and factory-made components
- Lightweight yet strong steel structure
- Fast and easy installation

BENEFITS

- Reduced construction time and cost
- High durability and low maintenance
- Flexible design and expansion options

STEEL STRUCTURES

Steel structures are strong and durable frameworks made from high-quality steel, widely used in buildings, bridges, and industrial projects. They offer excellent load-bearing capacity, design flexibility, and quick installation. Steel structures are cost-effective, long-lasting, and require minimal maintenance.

FEATURES

- High strength and durability
- Flexible design and easy customization
- Fast fabrication and installation

BENEFITS

- Cost-effective with reduced construction time
- Long service life with low maintenance
- Suitable for industrial, commercial, and infrastructure projects

INDUSTRIAL SHEDS

Industrial sheds are durable steel structures designed for factories, warehouses, and storage applications. They feature high strength, large clear spans, and quick installation for efficient space utilization. Benefits include cost-effectiveness, low maintenance, and long-lasting performance in tough conditions.

FEATURES

- Strong steel structure with large clear span
- Quick installation and easy customization
- Weather-resistant and durable design

BENEFITS

- Cost-effective construction
- Low maintenance and long service life
- Ideal for storage, manufacturing & industrial use
